#203 – 2736 Quadra Street , Victoria
(CUPE Local 1978 office)

The workload survey results show that workload is an urgent issue for you. Seventy-two per cent of CUPE health members are working through their breaks, and fifty-six per cent have characterised themselves as “emotionally exhausted”!

Come to the strategy session to get the full survey results and strategize on our next steps to call attention to this critical issue. Attend this meeting and make sure the voice of your job classification is well represented!
